3_Linux_Commands_Assignment_III

4. Try out the following examples and write down the commands you used to view each file.

a. View the contents of a file named "my_file.txt".

```
vaibhavi@vaibhavi99099W1:~$ cat my_file.txt
Hello, this is my first file.
vaibhavi@vaibhavi99099W1:~$
```

b. View the contents of a file named "my_other_file.txt" and number the lines.

```
vaibhavi@vaibhavi99099W1:~$ cat -n my_other_file.txt
     1  First line
     2  Second line
     3  Third line
vaibhavi@vaibhavi99099W1:~$
```

c. View the contents of a file named "my_third_file.txt" .

```
vaibhavi@vaibhavi99099W1:~$ cat my_third_file.txt
This is my third file.
vaibhavi@vaibhavi99099W1:~$
```

5. Create a new file and use the "cat" command to add content to it.

```
vaibhavi@vaibhavi99099W1:~$ cat > my_new_file.txt
This module is of operating system
course mobile computing
vaibhavi@vaibhavi99099W1:~$ cat my_new_file.txt
This module is of operating system
course mobile computing
vaibhavi@vaibhavi99099W1:~$
```

6. Try out some of the additional options for the "cat" command (e.g., -n, -b, -s).

-n = number of lines

```
vaibhavi@vaibhavi99099W1:~$ cat -n my_other_file.txt
     1  First line
     2  Second line
     3  Third line
vaibhavi@vaibhavi99099W1:~$
```

-b — Number only non-empty lines

```
vaibhavi@vaibhavi99099W1:~$ cat -b sample.txt
     1  First line

     2  Third line
vaibhavi@vaibhavi99099W1:~$
```

-s — Squeeze repeated blank lines

```
vaibhavi@vaibhavi99099W1:~$ cat -s blank.txt
First line

Second line
vaibhavi@vaibhavi99099W1:~$
```
